DIPESH

B.Tech in Computer Science & Engineering (2nd Year)

Global Institute of Technology, Jaipur • Jaipur, Rajasthan, India
Portfolio: **dipesh-portfolio-rose.vercel.app** | GitHub: **github.com/dipeshydv908/Dipesh-portfolio**

EDUCATION

Global Institute of Technology, Jaipur — Jaipur, Rajasthan, India
Bachelor of Technology (B.Tech) — Computer Science & Engineering — **2nd Year (2025 – 2029)**

- Core curriculum focusing on fundamental computing disciplines, algorithm design, data structures, and software engineering methodologies.

TECHNICAL SKILLS

- **Programming Languages:** C, C++
- **Web Technologies:** HTML, HTML5, CSS, CSS3, Responsive Web Layouts
- **Developer Tools:** Git, GitHub, VS Code

INTERNSHIP EXPERIENCE

AI Edge Workshop Intern — **CodeUp**
15-Day AI Edge Internship Program — *Jaipur, India*

- Completed an intensive 15-day AI Edge workshop and internship curriculum exploring AI workflows, edge computing concepts, and computational automation.
- Studied core architecture patterns for lightweight intelligent applications and practiced hands-on algorithmic problem solving.
- Authored clean, maintainable code implementations and completed verified program milestones under engineering mentor guidance.

FEATURED PROJECTS

To-Do List Web Application — **HTML, CSS, JavaScript, LocalStorage**
Source Code / Repository: **https://github.com/dipeshydv908/Dipesh-portfolio**

- Designed and built an interactive task management web application using an AI-assisted development platform.
- Implemented full task lifecycle actions: real-time task creation, title editing, completion status toggling, and deletion.
- Engineered persistent data storage with browser localStorage, ensuring users retain task state seamlessly across browser reloads without server overhead.
- Crafted a fully responsive, accessible user interface adhering strictly to modern semantic HTML and CSS styling guidelines.

ENGINEERING COMPETENCIES & HIGHLIGHTS

- Algorithmic Foundations: Practical academic and project experience in C and C++, emphasizing structured logic, modular programming, and data organization.
- Front-End Web Standards: Writing semantic HTML and responsive CSS with flexbox and grid layouts, prioritizing cross-device readability and zero visual clipping.
- Version Control Discipline: Managing code repositories with Git and GitHub, performing version-tracked commits and repository organization.
- Continuous Learning: 2nd-year B.Tech CSE student actively pursuing engineering excellence, hands-on development practices, and modern developer workflows.
